

Pathology Services for Ophthalmology Practices

For ophthalmologists, a trusted and reliable pathology partner with subspecialty expertise is essential. Oculus Pathology has pathologists with deep expertise in dermatopathology and ophthalmic pathology to partner with your practice to deliver superior patient care.

The Oculus Pathology Difference

Our board-certified pathologists provide exemplary diagnostic capability and expertise to diagnose benign and malignant cutaneous neoplasms of skin, conjunctiva, and the eye itself, including melanoma and unusual tumors such as primary cutaneous endocrine mucin-producing sweat gland carcinoma. We can also support diagnosis of infectious diseases affecting the eye, eyelids, and periocular skin as well as provide margin assessments for excisions. The Oculus Pathology lab provides direct immunofluorescence for diagnosis of cicatricial pemphigoid and lichen planus.

How We Serve You

Collegial, collaborative partnerships

Accessible part of the clinical team

Personally responsive to questions and consultation requests

Rapid turnaround times

Integration with your EMR
